

# Oral Dextrose

## Guide for nursery kittens

Use only the diluted 12.5% solution for this dosage, not the 50% solution.

Medical staff will provide the diluted solution on a weekly basis to the nurseries. The solution is required to be refrigerated for storage.

It is not necessary to "warm" up the dextrose prior to administering orally to kittens.

<b>Body Weight (grams)</b>	<b>VOLUME OF DEXTROSE</b>
<b>&lt;100</b>	0.1 cc
<b>100-200</b>	0.2 cc
<b>200-300</b>	0.3 cc
<b>300-400</b>	0.4 cc
<b>500-600</b>	0.8 cc
<b>600-700</b>	1 cc
<b>700-800</b>	1.2 cc
<b>800-900</b>	1.4 cc
<b>900-1000</b>	1.6 cc
